TO WHOM IT MAY CONCERN

Dear Sirs

Re: **Mr Paulos Haji Said**

This is to confirm that Mr Paulos Haji Said has completed one year of training, under my supervision, in techniques pertaining to the investigation of leprosy patient biopsies using the mouse footpad model. This training consisted of approximately six months in my Laboratory followed by six months in-service training. At the end of this time he was given a practical and written assessment by Mrs Celia Lowe, a Senior Research Officer in my Laboratory. He passed both the written (85%) and practical assessment with merit. In addition to the technical aspects he has a clear theoretical understanding of the work and is competent to train others.

Paulos also took the opportunity to increase his skills in general laboratory management, preparation of reagents, pharmacological assays for the presence of various drugs and in the day-to-day management of an experimental laboratory animal house.

Yours sincerely,

DR M J COLSTON

Head

Laboratory for Leprosy and Mycobacterial Research
